

To whom it may concern

Subject – SQUID Beacons by Era

This letter confirms that Oslo airport is using 48 SQUID Beacons by Era and we are very happy with the operational ATC performance of the DO260 ADS-B transmitter SQUID as promptly delivered by ERA and further reports them as being an extremely reliable product under all weather conditions.

Further more, Oslo airport uses the ADS-B positions into our ASMGCS systems and are very happy with the performance and accuracy that the SQUIDS provide.

Best Regards

*Lena*
